

Mental Health, Wellness, and Student Support Resources

May is Mental Health month, and the Pharmacology PhD Program leadership wants to make sure that you are aware of the following services. The Weill Cornell Graduate School of Medical Sciences recognizes that students may face mental health issues at any time during their training. These can arise from a variety of factors that may or may not be directly related to their graduate studies. To support our students, we provide extensive mental health and wellness support services.

Pharmacology PhD students who desire support are encouraged to contact the Program Director or Program Administrator, who will coordinate support and connect them with the appropriate professional staff. Students may also directly contact the graduate school deans or professional staff listed below if they prefer. These staff can also provide referrals to external medical professionals.

	<p>Minkui Luo, PhD Pharmacology PhD Program Director luom@mskcc.org 646-888-3066 (o)</p>	<p>Provides academic oversight for all Pharmacology students and coordinates support services with the graduate schools</p>
